## Inner West and South

The information on this website can be downloaded as a PDF brochure in [Chinese](#), [Arabic](#) or [English](#).

State Transit is proposing an update of the bus network for the Inner West and South (Region 6). The changes are designed to provide a more efficient and simple to understand bus network that would provide:

- More direct routes;
- Faster travel times; and
- Increased choice of destinations for customers.

Changes to the network would include the introduction of new routes, redirection of existing routes and withdrawal of some routes. You can also view the [proposed bus network map](#) for the Inner West and South (Region 6).

Your [comments on the proposal](#) to change the bus network are welcome. Submissions will be received until Friday 9 October 2009.
